**The aim and topics of the Workshop**

Workshop is organised by ETRA.CC project consortium. ETRA.CC is acronym of the project funded by the Sixth EU Framework Programme for Research and Technological Development. The full name of the project “*Empowering Transport Research with the Special Focus on the New Accession States and the Candidate Countries*” indicates the main aim of the project that is, to support transport research in those countries. In accordance with the project mission we offer you the possibility to attend our workshop. ETRA.CC workshop will be opened to all scientists, academia, owners and users of transport research facilities, authorities responsible for RTD policy, and other stakeholders with an interest in transport research. It is intended to assess user needs and review the state of the art in Czech Republic. Following the results of the workshop ETRA.CC will define thesis in preparation for future Community research policy activities in the field of transport research and their needs on technical and human resources in these countries. Apart from individual presentations, workshop will also include a plenum discussion. There should be the possibility for the local attendants to point out where they see the biggest and most important problems to be solved in transport area and how transport research could help to solve them; which problems are seen regarding co-operation and networking in their country, etc. Local attendants will be able to present their own research capacities and offer them to whole European community.

During the workshop Project team will also introduce:

- ETRA.CC project;

- EU research programmes;
- how to apply;
- how to establish consortia and to find suitable partners;
- what are the most important points to be followed;
- where are the biggest problems/pitfalls;
- what has to be taken into consideration;
- how are EC-programmes structured etc.

ETRA.CC team will also present good praxis in research networking. During registration attendants will get project materials, included USB flash memory stick with actual information. All the accepted papers will be published as CD proceedings, but the number of speakers at the workshop is limited. Therefore we kindly ask you to send your abstracts in time and in good quality. You can submit your abstract within the following topics:

1. Status quo and conception of research and development in the field of transport in Czech Republic.
2. Organisation and support for transport research in Czech Republic.
3. Transport research, education and training.
4. Collaboration and research networking at national level.
5. Collaboration with other European partners.
6. Participation of partners from Czech Republic in EU' research programmes.
7. Up-to-date results in transport research in Czech Republic.
8. Gaps in transport research in the country.
9. Participation of transport industry in transport research.
10. Presentation of organisations or institutions involved in the transport research.
